**Abdou, M. A.** *See* Cuevas, Smolentsev & Abdou

**Afanasyev, Y. D. & Korabel, V. N.** Wakes and vortex streets generated by translating force and force doublet: laboratory experiments, 119–141

**Alam, M.** Streamwise structures and density patterns in rapid granular Couette flow: a linear stability analysis, 1–32

**Billant, P.** *See* Otheguy, Billant & Chomaz; Otheguy, Chomaz & Billant

**Calmet, I.** *See* Magnaudet & Calmet

**Cattaneo, F. & Hughes, D. W.** Dynamo action in a rotating convective layer, 401–418

**Chen, L., Goto, S. & Vassilicos, J. C.** Turbulent clustering of stagnation points and inertial particles, 143–154

**Chomaz, J.-M.** *See* Otheguy, Billant & Chomaz; Otheguy, Chomaz & Billant

**Craster, R. V. & Matar, O. K.** On viscous beads flowing down a vertical fibre, 85–105

**Cuevas, S., Smolentsev, S. & Abdou, M. A.** On the flow past a magnetic obstacle, 227–252

**Darve, E.** *See* Saintillan, Shaqfeh & Darve

**Davis, R. H.** *See* Staben, Zinchenko & Davis

**Dritschel, D. G.** *See* Viúdez & Dritschel

**Gañán-Calvo, A. M. & Riesco-Chueca, P.** Jetting–dripping transition of a liquid jet in a lower viscosity co-flowing immiscible liquid: the minimum flow rate in flow focusing, 75–84

**Goto, S.** *See* Chen, Goto & Vassilicos

**Guba, P. & Worster, M. G.** Nonlinear oscillatory convection in mushy layers, 419–443

**Hughes, D. W.** *See* Cattaneo & Hughes

**Korabel, V. N** *See* Afanasyev & Korabel

**Li, Z.** *See* Roberts & Li

**Lopez, J. M.** Rotating and modulated rotating waves in transitions of an enclosed swirling flow, 323–346

**Magnaudet, J. & Calmet, I.** Turbulent mass transfer through a flat shear-free surface, 155–185

**Mahoney, D.** *See* Nomura, Tsutsui, Mahoney & Rottman

**Matar, O. K.** *See* Craster & Matar

**Nomura, K. K., Tsutsui, H., Mahoney, D. & Rottman, J. W.** Short-wavelength instability and decay of a vortex pair in a stratified fluid, 283–322

**Otheguy, P., Billant, P. & Chomaz, J.-M.** The effect of planetary rotation on the zigzag instability of co-rotating vortices in a stratified fluid, 273–281

**Otheguy, P., Chomaz, J.-M. & Billant, P.** Elliptic and zigzag instabilities on co-rotating vertical vortices in a stratified fluid, 253–272

**Riahi, D. N.** Nonlinear oscillatory convection in rotating mushy layers, 389–400

**Riesco-Chueca, P.** *See* Gañán-Calvo & Riesco-Chueca

**Roberts, A. J. & Li, Z.** An accurate and comprehensive model of thin fluid flows with inertia on curved substrates, 33–73

**Rottman, J. W.** *See* Nomura, Tsutsui, Mahoney & Rottman

**Saintillan, D., Shaqfeh, E. S. G. & Darve, E.** The growth of concentration fluctuations in dilute dispersions of orientable and deformable particles under sedimentation, 347–388

**Shaqfeh, E. S. G.** *See* Saintillan, Shaqfeh & Darve
